

Clean-Feed

Clean-Feed is an active anti-Salmonella blend of organic acids and salts with highly elected and purified essential oils. The synergistic compound of these acids, salts and essential oils help to control a broad-spectrum of anti-microbials, especially against Salmonella spp. Clean-Feed is of great choice as bio-hygienic treatment of swine and poultry feed. The grey-whitish, non-corrosive granular material is free flowing and heat stable during manufacturing of premixes and processing of raw materials or complete diets.

PHYSICO-CHEMICAL FEATURES

- Pack density: 0.7 - 0.9 g/cm³
- Moisture: < 10%
- pH-value (10% solution): 3.5 - 5.5
- Olfactory: very perceptive odour (organic acids & botanic aromatics)

SUPPLEMENTATION GUIDELINE

Dosage recommendations for Clean-Feed:

- 0.5-3 kg/MT: for standard diets; for storage of all oil-derived vegetal meals
- 3-5 kg/MT: for complete diets with indicated problems of microbial contamination; for high-fat fishmeal, meat-and bone meal, etc.

PACKAGING

Clean-Feed is packed in 25 kg net multi-layer paper bags with a strong, impermeable inner lining against moisture and oxidation.

MSDS

Available on request.

ACTIVE INGREDIENTS

- Benzoic acid, (4d210)
- Calcium propionate (E282)
- Calcium formate (E238)
- Citric acid (E330)
- Calcium Lactate (E327)
- Calcium butyrate
- Highly purified, plant-extracted, essential oil compounds

Mineral carrier: mycotoxin-binding Sepiolite clay (E562)
